To Whom It May Concern:

I wish to express the exemplary and professional approach of Electro Sense / Jacques Engelbrecht, who did electrical installation work for Tenneco. Electro Sense were responsible for the scope and definition of technologies, presentation of tender and finally installation and commissioning of a lighting and daylight harvesting project done in 2012.

We have done a number of sensor and lighting projects through Electro Sense and are always pleased with the results. Electro Sense always provides precise and objective advice.

Their costs are competitive with recommendation of high end hardware. They are always on time and reliable, flexible in accommodating production needs and their teams are always professional and well prepared.

I would like to confirm my recommendation for Electro Sense / Jacques Engelbrecht as one of the prime experts in the sensor and lighting field, and a pleasure to do business with.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "James Tarr". The signature is stylized and written over a large, light-colored scribble or background mark.
